AVALANCHE®

Ice Melter with CMA

LESS DAMAGE TO SURFACES*

Reduces damage to wood, concrete and brick, which makes Avalanche® one of the safest ice melters to use, when compared to the leading ice melter brands.

LESS HARMFUL TO VEGETATION*

Unlike some deicers, Avalanche® works to preserve vegetation and plant life. Avalanche® is less damaging to the environment when compared to the leading ice melt brands. With Avalanche® there is no slimy residue being tracked in, making clean up virtually non-existent.

REDUCED CORROSION TO METALS*

Avalanche® is specially enhanced with CMA (Calcium Magnesium Acetate), our formula guards against corrosion damage by forming a protective coating on the surface.

*When used as directed
