

The Silento 30/31/300/310

Powerful, Silent HEPA Vacuum Cleaner

Swish

The Silento: The Powerful, Silent Vacuum Cleaner From Centaur

★★★★★ 5-Star Rating: Value for Money

One of the **quietest** and **toughest built vacuums** to withstand any sort of abuse.

Gives **superior performance** & reliability to **outlast & outperform** competing vacuums for long hours and **"hard" daily use**.

The Silento comes with a HEPA filter for the **best air filtration possible**.

1.5 inch hose & intake easily **picks up larger debris**.

Easily pull along and **maneuver** the vacuum on any surface with its superior ball-bearing casters.

MADE IN
CANADA

"highly effective, extremely durable and cost effective"

—Brian Gingras, CBSE President Bee-Clean Building Maintenance

Super-Powerful Commercial Vacuum That's Quiet

hey say silence is golden -- and the Centaur Silento vacuum cleaner is about as golden as it gets when it comes to a quiet vacuum.

The Silento is fitted with a special "silencer" and just puts its head down and goes to work for you. It doesn't whine. It doesn't groan. It doesn't roar. It certainly doesn't disturb the peace.

That's why the Silento is the perfect vacuum for places where quiet is respected and expected. Think: churches, nursing homes, libraries, theatres, cinema lobbies, hotel lobbies, museums, offices in business hours, and the like.

And your cleaning crew will love working with the Silento vacuum, too. Especially if they like to "whistle while they work" or listen to the radio while they vacuum.

What about the suction power? Just because it's super-quiet, doesn't mean it's not powerful. In fact, the Silento is just as powerful, with just as much suction, as any other Centaur commercial / industrial vacuum cleaner. How come? Because it's fitted with a 960 Watts motor. So yes, the Silento really is the strong, silent type!

Built to Last 10-20 Years

Centaur's Silento vacuums are made with premium, long lasting components that will outlast and outperform any plastic substitute.

The motor enclosure, hose connection and casters are made of steel, while the tank is made from an ultra-durable spun polyethylene that is crack and crush resistant.

360° of Motion

Centaur's Silento vacuums sport premium double ball bearing casters which allows the vacuum to effortlessly glide over any surface while moving it along by its hose. This gives you the full range of motion while vacuuming efficiently and with ease.

3X Air Filtration (Silento-30/31)

Stage 1: Disposable paper dirt bag to trap large particles, dirt and most dust.

Stage 2: Washable fine dust cloth filter to trap any finer dust that doesn't get trapped by the 1st level filtration.

Stage 3: A corrugated HEPA filter that will trap 99.97% of allergens up to 0.03 microns.

"demonstrable superiority"

—Mike Yabrove, General Manager Janitor's Market Inc.

5 Features That Make The Silento Vacuum a Joy To Use

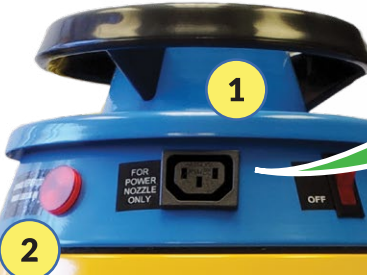

1) Auxiliary Power Brush Receptacle

Connect a SEBO or Wessel-Werk power brush (sold separately) to the auxiliary power plug provided on the SL-3 and SL-5 and you can now use a power brush to deep clean carpets.

2) HEPA Filter Indicator Light

Take the guess work out of cleaning or replacing your HEPA filter. The onboard indicator light lets you know when it's time to service the HEPA filter.

3) 1.5 inch Intake

Ideal for picking up larger debris and objects during vacuuming.

4) Double Action Metal Latches

Latches are needed to open and close the vacuum when accessing the filters or emptying the contents. The metal latches Centaur uses provide additional strength and durability, so the latches last a lifetime and don't fail on you (even if the vacuum were to ever roll down a flight of stairs).

5) Double Ball Bearings Casters

Gives you the full range of motion with ease, even when rolling it on carpet. And we can claim they are the absolute best in the industry.

"The suction is nothing short of incredible."

—Blain Konkle - Peterborough, ON (Happy Customer for 20+ Years)
