

Fusion Pro Dispenser Series

Features and Benefits

The Fusion Pro dispenser from DEMA engineering is a highly innovative and user friendly product designed to offer effective, accurate and efficient chemical dispensing solutions for a wide range of applications. The product has a robust and ergonomic design that is intuitive to use making it an ideal choice for industries in Jan-San, hospitality, food and beverage, healthcare and more.

Fusion Pro's modern and clean design makes it ideal for a variety of applications and installations. It uses DEMA's pilot activated water valve, a unique design built to operate like a traditional valve but with minimal service requirements. Configurations available for any application, and any requirement.

Choose from multiple product configurations, with or without cabinets for bottles anywhere between 2 L/ 0.52 gal and 4.73 L/1.25 gal in size.

The Fusion Pro dispenser comes with several features, benefits and improvements that make it stand out from the competition.

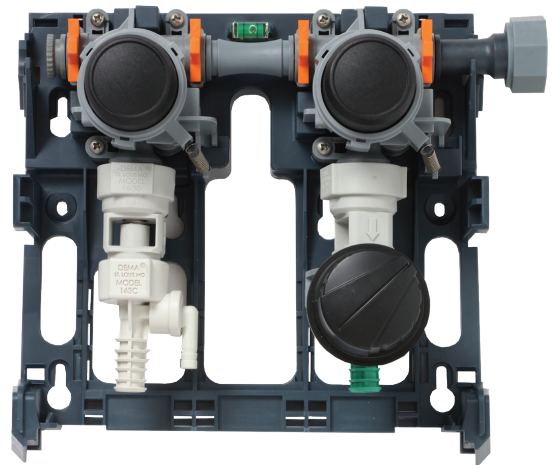

- It uses a new diaphragm valve that is designed for ease of installation and service.
- The diaphragm of the valve is easily replaceable with one tool. Inside, there are no extra parts like springs, plungers, tubes, it is just a diaphragm.
- The metering tips and tubing for the selectors is easily accessible for service.
- The cover is easily removed via snaps, no screws for service.
- Air Gaps have been improved in terms of ensuring consistent vacuum draw. Added features such as a priming pin help ensure correct and consistent vacuum draw through various conditions.
- Color coded and customized dispensers designed for Enviro-Solutions® & ServClean® Dispenser Programs.
- Ease of installation: Many mounting hole locations plus a bubble level is installed to allow the installer to easily level the dispenser.
- Quick change water inlet fittings: Water inlet and end plugs are quick change, bayonet style fittings that easily allow the installer to change the location of the water inlet fitting.

The Pilot Water Valve

The pilot-activated water valve simplifies service. With fewer components than competitive models, service and maintenance is easier and faster, making it the reliable water valve of choice.

Available in multiple configurations for product programs in both air gap & e-gap/action gap
