

ENZYMES NATURE'S ODOUR REMOVERS

Enzymes play a crucial role in odour removal due to their ability to break down organic compounds and eliminate odour-causing molecules. They are highly effective in targeting and neutralizing the source of odours, making them an essential component in many odour neutralizers.

Here are a few reasons why enzymes are so crucial in odour removal:

1. TARGETED:

They are highly specific and target specific types of odour-causing molecules

- Protease > breaks down proteins causing odours from organic waste or food.
- Lipase > targets fats and oils that create unpleasant smells.

2. FAST-ACTING & LONG-LASTING:

- Accelerate the breakdown of odour-causing substances by catalyzing chemical reactions.
- Eliminate odours at the molecular level, providing long-lasting results instead of temporary masking.

3. NATURAL AND BIODEGRADABLE:

- Considered safer because they are biodegradable, environmentally responsible and naturally occurring.

4. VERSATILE

- Effectively target various odours, including those caused by organic waste, pet accidents, food, smoke, and more.
- Suitable for multiple indoor settings, such as homes, offices, and public spaces.

5. NON-TOXIC & SAFE

- Bio-enzymes are non-toxic, safe for humans and animals, and do not release harmful fumes or irritate the respiratory system.
- Provide an environmentally friendly and sustainable alternative to chemical-based air fresheners that can contain dangerous ingredients

By harnessing the power of enzymes, odour neutralizers can effectively eliminate odours at their source, providing long-lasting freshness and improved indoor air quality. Swish offers a variety of bio-enzymatic products as well as concentrated odour neutralizers and space sprays.

Let our experts help recommend the right ones for your smelliest of tasks.

FEATURED PRODUCTS

SWISH® AROMX™ 35 BIO-ENZYMATIC ODOUR DIGESTOR

Formulated with a synergistic blend of specialized strains of bacteria, Aromx 35 digests organic matter to reduce foul odours in your facility. It contains billions of enzymes to remove odours in urinals, toilets, drains, and traps, and is also effective for removing organic stains on carpets, upholstery, and fabrics.

SKU #8935-1 | Supplier Product Code #8935-6
946 ml

ENVIRO-SOLUTIONS ES200 BIO-ACTIVE TREATMENT FOR DRAINS & DRAIN LINES

Formulated for the treatment of drains and drain lines in restaurants and commercial establishments. Its tensioactive agents assure optimal performance even in tough conditions, to prevent accumulation and clogging.

SKU #ES200-1 | Supplier Product Code #ES200-6
946 ml

Swish is Canada's source for quality cleaning supplies and equipment.

We help businesses small and large develop cost and health effective cleaning programs. Customers and employees can feel confident in the safety of your facilities. If you are looking for a single-source supplier with best-in-class products and technologies, we can help you develop custom programs that scale with you - no matter how big the job. Our national team and distribution network are ready to support your organization from training to planned maintenance.
