*Safer for Human Health
and the Environment*

 Agricultural Marketing Service
U.S. DEPARTMENT OF AGRICULTURE

 Organic production emphasizes natural processes and ingredients.

YOU CAN TRUST: 

YOUR FOOD

USDA-certified organic food means your food was:

- ✔ Produced using allowed ingredients:
 - Natural substances are generally allowed
 - Synthetic substances are generally prohibited
- ✔ Produced without excluded methods (e.g., genetic engineering is not allowed)

THE FARM

USDA-certified organic farms use:

- ✔ Physical, mechanical, and biological farming methods
- ✔ Farming methods that support biodiversity and soil health
- ✔ Only limited amounts of USDA-approved pesticides rigorously vetted by the NOSB, USDA, and the public that do not harm human or environmental health

THE STANDARD

The USDA National Organic Program ensures:

- ✔ Rigorous certification of every organic farm and business
- ✔ Annual inspection of every organic farm and business
- ✔ Public and expert engagement to keep the standard strong

USDA Organic is the **only** federally regulated organic label on the shelf. It indicates that farmers and businesses have met strict standards for the growing, processing, and handling of their products.
